## About Agromeds

Agromeds Crop solution Pvt Ltd, established in the year 2022 with a team of highly experienced and skillful professionals, who closely works with esteemed customers to help them to improve their farm productivity.

Agromeds, has been created with a strong vision of bringing the prosperity for their customers by providing them high quality Agri inputs, technologies & services, which can bring the change and help our farmers to enhance the productivity of their crops.

We, Agromeds are exploring all the opportunities of present and future and committed to provide the world class R&D products and technologies at the door steps of our customers.

Agromeds is fully committed for consistent initiatives for the wellbeing of our farmer community. The company have adopted the strategy of continuous expansion, development and marketing of high value brands according to our customers need and requirement to maintain its portfolio for a long run.

# AGROGAIN

- AgroGain GR is a one only patented formulation derived from the natural extracts of sea plants and unique in its quality in the world.
- It's works through TARMA™ and SPURT™ new cutting-age technology which helps plant to produce maximum yields.
- It's designed for optimized release of active ingredient along with high bioavailability at critical crop growth stages.
- It's a uniform granule size designed for homogenous mixing and dispersal during broadcasting
- It increases the root proliferations.
- Increases Nutrient and fertilizer uptake.
- Contributes to Soil Conditioning.
- Early and Better flowering to fruit setting ratio.
- Increase Productive Tillers and Branches.
- Increases Shoot height and Internodal Length.
- Improves the crop canopy.
- Better Increase in yield and quality of Produce.
- No synthetic or artificial hormones.
- Reduces the Abiotic stress.

## AGROGAIN GR

**Dosage – 4 Kg per acre.**

Application time- 7 to 22 days after sowing or transplanting. It can be broadcast with mixing of fertilizers or alone

## AG SILON

- The only Patented formulation of natural extracts of plants and one of its kind in the world
- Natural way to maximum yields through comprehensive plant growth.
- Rigorous and repeatedly tested with ICAR institutes in various crop systems globally.
- No synthetic or artificial chemicals or hormones added.
- Does not leave any residue on the produce and can be used on export quality fruits and vegetables
- It works through TARMA™ and SPURT™ new cutting- age technology which helps plant to produce maximum yields
- It Increases the Photosynthesis in plants.
- Improves the nutrient uptake.
- Unlock the potential of plant.
- It reduces the abiotic stress in plant.
- It increases the flowering and fruiting in plants.
- Improves the colour and size of the fruit.
- Good grain filling in crops like Rice, Maize and wheat.

## AG SILON

### **Dosage – 400 ml per acre.**

Application time- AG Silon, three sprays at nursery, tiller initiation and panicle initiation stage, has resulted in a higher yield.

### Compatibility

Ag Silon is compatible with most of fertilizers and agrochemicals products. It is recommended to test before preparing any mixture and to consult technically authorized person.

# AG FORT

- A unique and proprietary formulation to enhance plant immunity against a variety of viruses
- A prophylactic approach upregulating the pathogen resistance pathways and improve overall plant health
- Mechanism of Action using SUPR™ Pathways technology
- 100% natural product derived from extracts of sea plants
- Certified organic by IMO Control as per NPOP standards
- Rigorous and repeatedly tested with various crop systems from UAS Bangalore – included in the Package of Practices for PRSV management by the university
- Reduces the leaf curling, Chlorosis and Mottling in plants.
- Delay's Disease onset and improves the plant's vigour.
- Improves fruit colour and yield.
- New Growth is disease free.

## Compatibility

Ag Fort is compatible with most of fertilizers and agrochemicals products. It is recommended to test before preparing any mixture and to consult technically authorized person.

# AG FORT

**Dosage – 1.5 ml per liter of water.**

## FERTITEK

- Contains Nitrogen in stabilized Ammoniacal form thus reduces the N leaching losses.
- Supplies the Nitrogen for a longer period of time (4-10 weeks depending on the soil and climatic condition)
- Saves plant energy by supplying ammoniacal form of nitrogen for better growth and development of crop canopy
- Contains Nitrogen along with Sulphur for synthesise of protein and increased efficiency of photosynthesis.
- Comprises of Sulphur, which is responsible for the pungency, aroma and oil content in several crops.
- Fertitek helpful in better root and shoot development without having any harmful effect on soil micro flora and faun

### Compatibility

Ag Silon is compatible with most of fertilizers and agrochemicals products.

It is recommended to test before preparing any mixture and to consult technically authorized person.

## FERTITEK

**Dosage - - 1.5- 2.5 Kg/acre.**  
It can vary depend on the crop stage.

## ROOTWELL

- Rootwell WG is a natural humic extract, based on humic and fulvic acid (4:1 ratio).
- It's a high quality and rapidly dissolving micro granules that is 100% soluble in water avoiding blockages in application equipment.
- It's improves the physical, chemical and biological characteristic of soil, facilitating the availability and uptake of nutrients by crops.
- It's increases the quantity of fine (white) roots.

### Compatibility

Rootwell WG is compatible with most of fertilizers and agrochemicals products, except mineral oil, calcium nitrate, acid reaction products and herbicides that are not compatible with organic material. It is recommended to test before preparing any mixture and to consult technically authorized person.

## ROOTWELL

**Dosage - Soil application/Drip - 400 gm per acre.**

## AMPLE

- Ample is a natural plant biostimulant derived from a sea weed.
- It's harvested from the shore of Pacific Ocean containing cold water algae.
- It's extracted through a high level of modern extraction method.
- It's helps plant in fighting both Biotic and Abiotic stress like stresses from water, drought, cold, heat and chemicals overdoses.
- It's helps seedling overcome transplanting shocks
- It's helps to increases the immune system of the plants against pest attack.

### Compatibility

is compatible with most of agrochemical products. It is recommended to test before mixing with any chemical or other products and to consult technically authorized person.

## AMPLE

**Dosage – - Foliar spray 300 ml/acre or 2 ml per liter of water.**

- QUIKON is an ultra-efficient Biostimulant that results in total crop stimulation.
- The Ultra-efficient mode of action of QUIKON requires a lower dosage than many other Biostimulant.
- It's helps in increasing flowering success, enhancing fruit set and improving fruit development among other benefits.
- It's results on high yield and quality and ultimately profitability.
- It's has a high efficiency at low dosage

## QUIKON

## QUIKON

**Dosage – The optimum foliar dose is 20ml/100 liter of water** with a maximum product application of 80 ml/acre.

## JOSH

- Increases the flowering and resistance mechanism in plant.
- Help to boost the particular activity of plant when applied.
- Improves the size and weight of the produce.
- Help to increase the yield of crop

### Compatibility

Application – At vegetative growth stage, Flowering stage & fruiting or grain filling stage.

Compatibility- JOSH is compatible with most of fertilizers and agrochemicals products.

It is recommended to test before preparing any mixture and to consult technically authorized person

## JOSH

**Dosage – - 100 to 150 ml per acre**  
or 10 to 15 ml per liter of water.

## EPIC

- Enhance the vegetative growth and flowering in the plant.
- Improves the photosynthesis activity in plant.
- Improves the nutrient uptake in the plant.
- Save from flower dropping.
- Increase the yield and improves the quality of produce.

### Compatibility

EPIC is compatible with most of fertilizers and agrochemicals products. It is recommended to test before preparing any mixture and to consult technically authorized person.

## EPIC

**Dosage - 150 to 200 ml per acre**  
or 0.75 to 1 ml per liter of water.

## CROP PROTECTION CHEMICALS UNDER AGROMEDS UMBRELA

S.NO	CATEGORY	BRAND NAME	TECHINICAL NAME	DOSAGE/ACRE
1	INSECTICIDES	AGROMETHRIN	BIFENTHRIN 10% EC	300-400 ML
2	INSECTICIDES	CYLOMEDS	LAMDA CYHALOTHRIN 4.9% CAPSULATED FORM	300-400 ML
3	INSECTICIDES	AGROMEECTIN	EMAMECTIN BENZOATE 5% SG	100 GM
4	INSECTICIDES	AGROFEN	PROFENOFOS 40% + CYPERMETHRIN 4%	300-400 ML
5	INSECTICIDES	PATRON	PYMETROZIN 50% WG	120 GM
6	FUNGICIDES	BLASTOMEDS	TRYCYCLAZOLE 75% WP	120-150 GM
7	FUNGICIDES	FINISHER	AZOXYSTROBIN 4.8% + CHLOROTHALONIL 40% SC	300-400 ML
8	FUNGICIDES	AGROMYCIN	VALIDAMYCIN 3%	300-400 ML
9	FUNGICIDES	REFRESHER	AZOXYSTROBIN 11% + TEBUCONAZOLE 18.3% SC	250-300 ML
10	HERBICIDES	OXYMEDS	OXYFLUOFEN 23.5% EC	170/350 ML
11	SPREADER	WETMEDS	SILICA BASE SPREADER/ACTIVATER	50-100 ML

# LET'S GROW TOGETHER

TRANSFORMING  
AGRICULTURE.  
CHANGING LIVES.

Agromeds, is aspiring to become a best organization in Agri input industry by building a highly skillful team and providing a best crop solution to our customers through them and become a part of a growth journey of the nation

A photograph of a smiling farmer in a red shirt and red turban, holding a yellow bowl and scattering fertilizer into a field of green crops. The background is a blurred green field under a blue sky with light clouds.
